OFFICE SCREEN SYSTEM

PANEL is a comprehensive range of advanced screens that define and support work areas, creating visual and acoustic privacy.

PANEL.40: Office Screen System

The division of space and the creation of visual and acoustic privacy within open plan offices is essential to support the sophisticated business processes of the modern workplace.

PANEL, with both its desk mounted and floor standing options, can be attached or linked to almost any desking. Its advanced power and data infrastructure ensures the effective management of services.

A series of aluminium extruded sections create a wide range of configurations with the power rail providing flush mounted power and data access from both sides of screens that are only 40mm thick.

- > stylish extruded aluminium
- > 40mm thick lightweight panel construction
- > standard fabric, customer's own fabric, glazed, veneer and metal finish options
- > wide range of standard sizes that can also be customised
- > power and data can be integrated flush on both sides
- > optional cable-ways from the ceiling, floor or wall with full separation
- > pre-wired or wired on site
- > tool rails accommodate a wide range of paper management accessories as well as shelving and cabinets
- > stand alone option allows complete power and data infrastructure to be fitted independently of desking.

Functional Design

Services direct to desktop
